Experience

Software Engineer *HCL Technologies Noida*

January 2022 – May 2025

Project: LGIM (Legal & General Investment Management), London – Web Support

- Provided production support and maintenance for LGIM's web-based applications, ensuring minimal downtime and high availability.
- Diagnosed and resolved front-end issues using HTML, CSS, and JavaScript, improving overall user experience and performance.
- Handled backend API support and troubleshooting using Node.js, optimizing request handling and improving system response times.
- Implemented small-to-medium feature enhancements and bug fixes, ensuring alignment with LGIM's digital compliance standards.
- Ensured timely communication and escalation of critical issues to stakeholders, maintaining service quality.

Junior Android Developer *Havfly Services, Hisar (HR)*

July 2021 – January 2022

- Developed and maintained Android applications using Java and Android SDK, ensuring compatibility across multiple devices and Android versions.
- Built user-friendly UI layouts using XML with responsive design principles and integrated Material Design components for modern look and feel.
- Implemented Firebase Realtime Database, Firebase Authentication, and Cloud Storage to manage app data, user login, and media uploads securely.
- Worked with Fragments, Activities, and Navigation components to design intuitive navigation flows.
- Integrated third-party libraries such as Glide for image loading and Retrofit for API communication.
- Used ListView and Custom Adapters for dynamic content rendering and efficient data handling.

Education

June 2015 – July 2018

BCA Computer Application, MDU Rohtak
